

**Summary of lobster catch and effort data
available from Gough, Inaccessible and
Nightingale Islands: November 2007**

CHARLES EDWARDS, SUSAN JOHNSTON AND DOUG
BUTTERWORTH

*Marine Resource Assessment and Management group,

University of Cape Town
November, 2007*

Here we present the available catch and effort data on lobster (*Jasus tristani*) from the islands of Gough, Inaccessible and Nightingale. Most of the data is from vessel logsheets, and is reported alongside the official catches recorded by Ovenstone fisheries and by James Glass at the Natural Resources Department (NRD) on Tristan da Cunha. Comparison reveals a number of discrepancies that this document is intended to help resolve.

Table 1: Summary of data available from **Gough** Island. All catches are recorded in kilograms and effort in the number of traps hauled.
 LL: Longline; PB: Powerboat; M: Monster Trap; PP: Plastic Pot or Beehive Trap

Season	Retained Catch		Discards		Total		Effort			Ovenstone		NRD	
Year	Total	LL	PB		Catch	Effort	M	PP	PB	Catch		Catch	Effort
