

## Input data for the 2007 OMP

S.J. Johnston and D.S. Butterworth

The following tables report the input data required by the new area-disaggregated OMP for calculating the 2007 TAC. Note that the 2006 somatic growth rate values are preliminary and will be updated by OLRC shortly.

Table 1: Hoopnet CPUE (from Glazer 2007a, b). No Hoopnet CPUE data are available for A7.

Using the above data as input into the new area-disaggregated OMP, Table 5 below reports the resultant TAC estimates for 2007 for both the “2445” MT and “2401” MT tuning. The Global TAC is thus a 10% decrease from the 2006 value of 2857 MT.
