

INVITATION TO SESSIONS OF THE 2023 INTERNATIONAL STOCK ASSESSMENT WORKSHOP

Monday 27 Nov to Friday 1 Dec

Room M212, Mathematics Building, UCT

This year's workshop is being run on a smaller scale than in previous years. Aside from a wrap-up session at 11-00 am on the morning of Friday 1, attendance will be by invitation only at what will be detailed genuine workshop-type sessions.

Apart from a daily session for a group learning the TMB coding language, four topics will be considered:

- Sardine genetics in the context of a new sardine stock structure model
- Squid modelling and management
- Hake genetics and stock structure
- Stock-recruit relationship estimation/modelling with non-stationarity

A revised schedule follows on the next page, though this may be changed again slightly later (notification of such would be circulated). Further information on documents and so forth will follow later. The invitees attending are Andre Punt, Peter Teske, Robin Waples and Mike Wilberg.

Invitees to the four sessions are as follows (not including a few observers also accepted):

<u>Sardine</u>	<u>Squid</u>	<u>Hake genetics</u>	<u>Non-stationarity</u>
