- Subject matter experts

icts.uct.ac.za/uctmobile

- Campus maps
- Timetables
- Course and test results

Use technology responsibly

- Keep your anti-virus up to date. If you use Trellix, updates occur automatically.
- Use the internet responsibly and in moderation.
- Respect all ICT policies (available on the ICTS website).
- Obey all student computing lab rules.
- Never share your username or password.
- Don't use the internet for anything illegal (streaming, sharing, downloading copyrighted content, etc).
- Don't connect too many devices to the WiFi. The more you use, the slower the connection for you and everyone around you.
